

Harigovind Sajimon

Product Designer · UX & Visual Design

harigovind.ie | harigovind.ie@gmail.com | +353 89 478 3193 | Dublin, Ireland

Product Designer with experience across UX, visual communication, and interactive systems. Skilled in transforming complex information into intuitive user experiences through behavioural design, strong visual craft, and research-driven workflows.

SKILLS

Design: UX Design, Visual Design, Wireframing, Interaction Design, Information Architecture

Tools: Figma, Adobe CC, Blender, Substance Painter

Web: HTML, CSS, JavaScript

Creative: Photography, Storyboarding, Visual Storytelling

Methods: User Research, Usability Testing, UX Analysis, Prototyping, Cognitive Walkthroughs

EXPERIENCE

UX Analyst & Content Strategist

Grido, Remote (Munich, Germany)

Jan 2025 – Mar 2025

- Audited an AI-driven content platform through cognitive walkthroughs and rigorous UX analysis, flagging 18 usability issues including 7 major interaction roadblocks.
- Assessed complex user flows to deliver structured wireframe recommendations that eliminated navigation friction across core user pathways.
- Completely restructured large automotive datasets for a digital car museum, improving information architecture, search findability, and user orientation.

Freelance Multidisciplinary Designer

Independent Practice, Mumbai (India) & Dublin (Ireland)

Aug 2022 – Oct 2025

- Delivered visual design, branding, and UX across e-commerce and digital products, building scalable design systems and brand architectures for client teams.
- Produced 3D models, character rigs, animation, and end-to-end videography for advertising and motion-graphics projects.

Creative Director

Wesualize Studios, Kochi, India

Nov 2023 – Feb 2024

- Directed creative execution and end-to-end production pipelines for high-profile VFX advertising campaigns for brands including Birla Group and P.F. Chang's.
- Crafted multi-layered storyboards blending complex 3D environments with live-action footage.
- Managed a 3-person on-site production crew — two cinematographers and a drone operator — to guarantee precision execution under tight broadcasting schedules.

Design Intern

Tata Consultancy Services (TCS), Mumbai, India

Jun 2022 – Aug 2022

- Studied interaction patterns in immersive virtual environments to optimise spatial usability and task workflows.
- Produced high-fidelity 3D concepts and assets in Blender informed by user research and prototype testing.
- Presented interactive design frameworks to senior stakeholders for integration into engineering roadmaps.

Visual Designer

YoZu, Mumbai, India

Dec 2020 – Jan 2022

- Designed user interfaces and high-fidelity visuals across 25+ interactive screens for an educational application.
- Accelerated asset production pipelines by personally modelling 20 high-fidelity 3D assets in a single week, contributing to a team delivery of 100+ production-ready models.

- Collaborated closely with front-end and Unity engineering teams to streamline asset handoff workflows, reducing cross-team integration friction.
 - Mentored junior digital artists and tracked project milestones within fast-paced agile sprint schedules.
-

SELECTED PROJECTS

Hiro, Task Starting Assistant

Product Design / UX / Behavioural Design

- Designed a productivity system to reduce task-initiation friction, shifting UX focus from rigid discipline to energy-aware micro-step workflows.
- Formulated a 4-subsystem core architecture rooted in Temporal Motivation Theory.
- Conducted 27 deep-dive user research interviews to isolate emotional avoidance behaviours and procrastination triggers.

DUB Transit

UX Design / Information Design / Urban Mobility

- Investigated commuter pain points across Dublin's public transit infrastructure via contextual inquiry and field interviews.
- Shaped a real-time mobile interface using glanceable route cards to streamline rapid decision-making during service disruptions.
- Validated prototype with 32 participants, achieving 100% adoption interest rate while identifying a critical user requirement for an optimised night-use dark mode.

City: Beneath the Surface

Data Visualisation / UX Design / Interactive Media

- Synthesised complex municipal datasets into an interactive multi-layered visual narrative on underground city infrastructure.
- Exhibited at graduation show for one week, engaging 500+ attendees and validating layered navigation design through live behavioural observation.

Personal Portfolio Website (harigovind.ie)

UX Design / Front-End Development / AI-Assisted Workflow

- Planned and built a responsive portfolio site using AI-assisted front-end workflows and iterative prototyping.
 - Wireframed information architecture, layout grids, and interaction patterns in Figma before development.
 - Executed cross-device QA across iOS, Android, iPad, Windows laptops, and high-resolution desktops for consistent layout and assets.
-

EDUCATION

MA Creative Arts, Visual Communication (EQF Level 7)

TU Dublin, Ireland

Sep 2024 – Oct 2025

Focus on visual communication, research methodologies, and design for care and urban systems. Graduation project: data visualisation of essential urban workers and city infrastructure.

Bachelor of Design, Communication Design

Indian Institute of Technology Bombay

Jul 2019 – Jul 2023

Human-centred design, visual storytelling, interactive media, and immersive digital experiences. GPA 8.04. Graduation project: VR interactive experience in Unity.

ADDITIONAL EXPERIENCE

Aircraft Appearance Crew

Sky Handling Partner, Dublin, Ireland

Jan 2026 – Present

- Uphold international safety and hygiene standards within fast-paced aircraft turnaround operations.

Food & Beverage Associate

St Helen's Hotel, Dublin, Ireland

Oct 2025 – Jan 2026

- Provided high-volume guest service in a luxury hospitality environment while maintaining operational efficiency.
